EDUCATION

Dayananda Sagar College of Engineering, Bangalore
B.E. Computer Science and Engineering

Current GPA: 8.13/10
2022 – 2026

EXPERIENCE

AI Full Stack Developer | Anthrolic

Oct. 2025 – Nov. 2025

- Revamped the platform's **AI-powered evaluation engine**, evolving it from a minimal feedback system into an intelligent model that analyzes answers by **introduction, body, and conclusion**, greatly improving evaluation depth and accuracy.
- Led and mentored an intern through feature development and code reviews, providing **technical direction and architectural guidance** to maintain clean, scalable, and high-quality codebases.
- Developed and integrated key **full-stack features**, including **OTP-based authentication with Firebase**, optimized core Next.js and Node.js modules, and resolved major bugs to enhance performance, security, and user experience.

Head of Technology | Anthrapi

Jul. 2025 – Sept. 2025

- Overseeing the **technical vision, architecture, and execution** of all client projects, ensuring every product is built for scalability, maintainability, and long-term growth.
- Leading the development of **AI-powered agent systems** and automation tools, integrating them into client projects to enhance productivity, streamline workflows, and deliver intelligent user experiences.
- Actively **designing and building full-stack applications** using **Next.js**, **Node.js**, and cloud-native services, maintaining high standards of performance, security, and UX.

Full Stack Developer | Anthrapi

Dec. 2024 – Jun. 2025

- Built **responsive, SEO-optimized** websites and apps using **Next.js**, **TypeScript**, and **Tailwind CSS**.
- Implemented **scalable database solutions** to ensure high availability and efficient data handling across client projects.

PROJECTS

HireLoom | *FastAPI, LangGraph, LangChain, Firebase, Gemini, Telegram API, Next.js, TypeScript*

[GitHub](#)

- Engineered an **agentic AI system** that autonomously managed the entire hiring workflow, from *resume parsing, analysis, and ranking* to *candidate communication* and *interview scheduling and analysis*.
- Built the backend with **FastAPI** and **Firebase**, orchestrating multi-agent workflows via **LangGraph** and **LangChain** to deliver intelligent, context-aware automation.
- Enabled **fully autonomous candidate interactions** through **Telegram webhooks**, integrated **Google Calendar** and **Meet APIs**, achieving a **70% reduction in recruiter workload** and a **3× faster hiring process**.

CareerPilot | *Agentic RAG, FastAPI, LangGraph, Chrome Extension, Next.js, TypeScript, Supabase, Playwright*

[GitHub](#)

- Developed an **agentic AI system** that analyzes a candidate's full digital footprint; from resumes, GitHub, and LinkedIn to personal projects to craft **context-aware, tailored job applications**.
- Implemented a modular backend with **FastAPI** and **LangGraph**, integrating **RAG pipelines** for profile enrichment and dynamic resume generation aligned with each job's description.
- Built a **human-in-the-loop Chrome extension** to autofill job application forms using intelligent form parsing and agent-generated responses, ensuring **secure, platform-compliant automation**.

NyayaGPT | *RAG, FastAPI, Docling, Gemini, Pinecone, Embedding Model*

[GitHub](#)

- Developed an **RAG-based legal chatbot** capable of answering any query about the **Indian Constitution** with high factual accuracy and direct reference sourcing.
- Implemented **smart chunking** using **Docling**, optimizing context segmentation and embedding relevance, which minimized hallucinations and improved citation precision.
- Vectorized the entire Constitution using **BAAI/bge-large-en-v1.5** embeddings and stored them in **Pinecone**, enabling efficient semantic retrieval and context-rich responses via **Gemini**.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Go

Frontend Development: React, Next.js, Tailwind CSS, Bootstrap, Redux, Zustand, Figma

Backend Development: FastAPI, Flask, Django, Node.js, Express.js, Fastify, Gin, Fiber

Databases & ORMs: PostgreSQL, MySQL, Supabase, MongoDB, Redis, Firebase, Drizzle, Prisma

Agentic AI: LangChain, LangGraph, Pydantic AI, Google ADK, ChromaDB, Pinecone, MCP

ACHIEVEMENTS

ACM India Winter School 2025 – IIT Ropar: among the **40 students** selected nationwide.

Winner, Sentinel Hack 5.0: secured 1st place in the **Sentinel Hack 5.0 Hackathon**.

Runner-Up, HACK-O-RAMA!: secured 2nd place in the **HACK-O-RAMA! Hackathon**.

Second Runner-Up, DSU Devhacks'24: achieved 3rd place in **DSU Devhacks'24**.

Runner Up, BMSCE Phaseshift: awarded 2nd place at Pragathi Idea Convention, **BMSCE Phaseshift**.

30+ Stars on GitHub: earned 34 stars for the open-source repository Mivro.
